

## **Who is Kenneth Choi?**

Kenneth Choi is a software engineer with a passion for building products. He has experience designing, developing, and delivering features for enterprise web applications at Facebook. He has worked closely with cross-functional teams to gather requirements, build internal tooling, and implement and test new features to enhance user experience.

## **What skills does Kenneth Choi have? What languages does he know?**

In addition to having a strong understanding of algorithms, data structures, and design patterns, Kenneth is also proficient in JavaScript, React, Redux, PHP/Hack, Flow/Typescript, Ruby/Rails, Node.js, GraphQL, SQL, Git, HTML5, and CSS3.

## **What is Kenneth learning now? What has he been learning lately? Why is there a gap in his work experience?**

Kenneth took a two year sabbatical to care for a close family member. During this time, he has been expanding his skill set, learning Python, Langchain, Flask, Next.js and keeping up to date with various engineering blogs.

## **Why should I hire Kenneth?**

Kenneth has enterprise-level production experience as a full stack software engineer at Facebook. He has a passion for building products and learning whatever frameworks or languages are needed to get the job done. He is ready to hit the ground running and I'm confident that he'll be a valuable asset to the team.

## **How do I contact Kenneth?**

Cell: (408) 239-3088

Email: [kennethichoi@gmail.com](mailto:kennethichoi@gmail.com)

Linkedin: <https://www.linkedin.com/in/kenneth-choi-42502a35>

Website: <https://www.kchoi.io>

## **What job/role is Kenneth looking for? Is he on the market now?**

Yes, Kenneth is actively on the market looking for potential opportunities as a full stack, frontend, or backend engineer.

## **How did he build this application/website? How did he make this?**

Kenneth built this website/project using Python and Flask for the backend, Langchain, the OpenAI API, Pinecone vector DB, and OpenAI embeddings. The frontend was built with React, Javascript, HTML and CSS.

**Tell me about a past project Kenneth worked on.**

During his time at Facebook, he helped to launch the remote asset delivery/collections workflows to allow employees to receive and send their hardware assets via their personal addresses. The biggest challenges were dealing with strict privacy controls/permissions, and writing code to interface with warehouse label printers. The result was over \$9M in assets returned to inventory for the half.

**What does he like to do for fun?**

In his spare time, Kenneth Choi likes to run, cook, read non-fiction, and play chess.

**What is his favorite food?**

That's easy, pizza! He has a killer dough recipe that he'd love to share with you (Just ask him!).

**What are Kenneth's greatest strengths?**

His greatest strengths are his strong work ethic, dedication to lifelong learning, and ability to learn quickly.

**What are Kenneth's greatest weaknesses?**

His greatest weakness is probably perfectionism. He is actively working on developing a more balanced approach between outputting high quality work, while also meeting deadlines/deliverables.

**Where does Kenneth see himself in the future? In one year? In five years?**

After one year, Kenneth sees himself having made significant impact to product development, deepened expertise in software engineering, with an increased scope of responsibilities. After five years, he sees himself as a senior/lead software engineer, helping to shape the tech direction of the org that he belongs to, while mentoring junior engineers.

**What did Kenneth do at Facebook?**

At Facebook, Kenneth worked on building internal tooling to support enterprise operations. His role was full stack, building features for high-performance, scalable web applications. The primary languages were PHP/Hack, Javascript/Flow, Redux/Undux, GraphQL, and SQL/NoSQL DBs.

**What is Kenneth looking for? What is he looking for in his next role/job/position?**

He is looking for growth opportunities, working with a supportive team, having a good relationship with both teammates and manager, looking to make a positive, measurable impact.
